[Advanced Imaging Certificate in Magnetic Resonance Imaging](#)
UAB to begin using advanced PET/MR imaging machine in standard-of-care clinical treatment. Combining two high-powered imaging techniques into a single scanner allows UAB to acquire and study PET and MRI data simultaneously, enabling new opportunities for diagnostic imaging of cancer, the brain and heart.

[Advanced CT and MR Imaging Techniques: An Academic Whim or ...](#)
Students will gain the knowledge required to safely work with patients and staff in a magnetic resonance imaging environment. Students with clinical MRI experience will become better prepared for the advanced level MRI Certification offered by the American Registry of Radiologic Technologists (ARRT).

[Advanced MR techniques in multicenter clinical trials ...](#)
Advanced MR Imaging in Sarcoma Patients The safety and scientific validity of this study is the responsibility of the study sponsor and investigators. Listing a study does not mean it has been evaluated by the U.S. Federal Government.

Advanced MR Imaging in Pediatric Brain Tumors, Clinical Applications. Advanced MR imaging techniques, such as spectroscopy, perfusion, diffusion, and functional imaging, have improved the diagnosis of brain tumors in children and also play an important role in defining surgical as well as therapeutic responses in these patients.

[Advanced MR Imaging in Sarcoma Patients - Full Text View ...](#)

It is essential that advanced CT and MR imaging techniques be embraced within the community of practicing radiologists. To justify reimbursement, some actions are required: (1) Academic institutions, societies, and manufacturers should work together to organize prospective, large-scale, multicenter trials to test these advanced techniques and assess their efficacy in the patient care arena.

Developing novel resting-state and task-based functional MRI together with diffusion tensor imaging (DTI) may also significantly advance this field. And last but not least, the development of novel radioactive tracers in SPECT and PET imaging or the new combination of different optical imaging methods like spectroscopy can provide new insights into the pathophysiology and treatment efficacy of these disorders or may even predict their treatment response.
