The ALCO 244 engine
An improved, I believe even catalogued, Alco PA with the 251 engine would have been a solid passenger locomotive. But the PA's reputation as a maintenance "problem child" combined with declining passenger ridership combined to spell the end of the PA's--and none were built. It's not as simple as just blaming the 244 engine.

ALCO 244 - Wikipedia
The American Locomotive Company's model 244 prime mover was developed during the mid-1940s to power its post-war diesel locomotives. Interestingly, while Alco helped pioneer diesel technology dating back to the 1920s it had difficulty truly competing against Electro-Motive due to reliability issues with its diesel engines.

ALCO 251 ENGINE BLOCKS - Railway Preservation News
The ALCO 244 was a diesel prime mover built by the American Locomotive Company (ALCO). An evolution of the earlier 241 diesel engine, it powered ALCO's first generation of production road locomotives. The 244 engine was developed to create an engine capable of being used in railroad freight and passenger locomotives.

ALCO 251 - Wikipedia
The ALCO 251 diesel engine was originally designed for locomotive power. It is estimated that ALCO 251 engines power some 15,000 locomotives from the utilitarian-duty 900 HP switchers to the 4400 mainline freight locomotives. The ALCO locomotive engine is also known and respected as a long-lived diesel powerhouse for driving icebreakers, tug ...

Alco 251 Diesel Engine Maintenance
The American Locomotive Company's (Alco) model 251 prime mover would be the last diesel engine the manufacturer ever put into production. The power plant was conceived purely out of necessity due to the problems and failures of the earlier 244, which had powered its first FA and PA cab models designed for main line service.
