Magnetism is a class of physical phenomena that are mediated by magnetic fields.

Electric currents and the magnetic moments of elementary particles give rise to a magnetic field, which acts on other currents and magnetic moments.

name given to a plot of the angle function in the field expression of an antenna. There are a number of ways this information can be presented, and you will run across most of them in one place or another. In general, we can call this function $f(\theta, \phi)$ where (θ, ϕ) are the spherical coordinate angles in Figure 2.1. Typically, we are interested in the magnitude of this ...
