Chemical Engineering: An Introduction.
Chemical Engineering: An Introduction is
designed to enable the student to
explore the activities in which a modern
chemical engineer is involved by
focusing on mass and energy balances
in liquid-phase processes. Problems
explored include the design of a
feedback level controller, membrane
separation,...

engineering and science experience to girls entering 7th and 8th grades. SUMMER "SOLUTIONS" CAMP (9-10th Grade) This live-in week long camp is designed to give girls who will be in the 9th or 10th grade the experience of college life while learning more about career options in science, engineering, and math.

= 479 K = 206C. At this temperature the equilibrium favors neither the reactants nor the products. At lower temperatures G is negative, so the products are favored and the reaction goes forward. At higher temperatures the equilibrium shifts to favor the reactants, as is expected for an exothermic reaction.
