In non-technical terms, M-theory presents an idea about the basic substance of the universe. As of 2019, science has produced no experimental evidence to support the concept that M-theory is a description of the real world.

New Criticism. A literary movement that started in the late 1920s and 1930s and originated in reaction to traditional criticism that new critics saw as largely concerned with matters extraneous to the text, e.g., with the biography or psychology of the author or the work's relationship to literary history.

This is a survey of the main trends in twentieth-century literary theory. Lectures will provide background for the readings and explicate them where appropriate, while attempting to develop a coherent overall context that incorporates philosophical and social perspectives on the recurrent questions: what is literature, how is it produced, how can it be understood, and what is its purpose?

A gauge theory is a type of theory in physics. The word gauge means a measurement, a thickness, an in-between distance (as in railroad tracks), or a resulting number of units per certain parameter (a number of loops in an inch of fabric or a number of lead balls in a pound of ammunition). Modern theories describe physical forces in terms of fields, e.g., the electromagnetic field, the ...

This is a short introduction to Galois theory. The level of this article is necessarily quite high compared to some NRich articles, because Galois theory is a very difficult topic usually only introduced in the final year of an undergraduate mathematics degree.
