pH of preparations affecting the on-off drug penetration behavior through the thermo-responsive liquid crystal-embedded membrane.

Analytical Profiles of Drug Substances and Excipients by ...

Two tablets of rifampicin and 1 capsule (size 4) of isoniazid were put into a hard gelatin capsule (size 00). The in vitro drug release and in vitro drug degradation studies were performed. Rifampicin was released over 4 hours by zero-order kinetics from the novel dosage form. More than 90% of isoniazid was released in alkaline medium in 30 minutes.
