Sterilization of health care products — Moist heat — Part 2:
Guidance on the application of ANSI/AAMI/ISO 17665-1 This
Technical Specification provides general guidance on the
development, validation and routine control of moist heat
sterilization processes and is intended to explain the
requirements set forth...

AAMI 17665-1

The standard also requires detailed documentation of all
conditions that affect the process performance now and in the
future. ISO 17665-1 only provides very general guidelines on
steam sterilization requirements and operations. ISO 17665-2

Factors and Principles: The Science of Sterilization ...

In ANSI/AAMI/ISO 17665-1:2006/(R)2013, an overkill process is described as providing a minimum 12 log reduction of microorganisms that have a D value of 1.0 minute at 121 °C. However, commercial BIs for steam sterilization commonly have D values at 121 °C that are greater than or equal to 1.5 minutes.
