Materials Evaluation, December 2019. The December issue focuses on the nondestructive testing of metals: the first paper discusses an ultrasonic guided wave inspection method for in-situ monitoring of metallic structures, and the second explores a comparison of pulsed and lock-in thermography techniques for nickel-boron coatings.

One additional year of experience beyond the Level II requirements in NDT in an assignment comparable to that of an NDT Level II in the applicable NDT methods. To be eligible to sit for the ASNT NDT Level III exams, a candidate with two years of passing grades in engineering or science study at a university or technical school must have

Study Kit - Ultrasonic Level II (UT) (CD-ROM)

About Ultrasonic Testing (UT). Ultrasonic testing uses the same principle as is used in naval SONAR and fish finders. Ultra-high frequency sound is introduced into the part being inspected and if the sound hits a material with a different acoustic impedance (density and acoustic velocity), some of the sound will reflect back to the sending unit and can be presented on a visual display.
