Biological Anthropology

scientific study of humans and their cultural, social, biological, and environmental aspects of life in the past and the present. Cultural anthropology is one of four areas of study in the broader field of anthropology (archeology, physical or biological anthropology, and linguistics being the other three).

Read Online Biological Anthropology

Biological anthropology, also known as physical anthropology, is a scientific discipline concerned with the biological and behavioral aspects of human beings, their extinct hominin ancestors, and related non-human primates, particularly from an evolutionary perspective. This subfield of anthropology

Read Online

Biological

Anthropology

systematically studies human beings from a biological perspective.
