In response to COVID-19, we've developed over 150+ free webinars, printables, articles and more to support families and educators. You'll find specific structures, helpful tips and practical tools that support an adult-first, child-second approach to building safety, connection and problem-solving in uncertain times.

Home | Conscious Discipline

Throughout the week, our students are involved in Discovery Learning: student driven inquiry learning. Students follow the process of Design Thinking, giving them the skills to be creative problem solvers. Students participate in project based learning, with all learning activities being student-centred and focused on peer collaboration.

Principles of Learning and Teaching

Principles for teaching problem solving. Model a useful problem-solving method. Problem solving can be difficult and sometimes tedious. Show students by your example how to be patient and persistent and how to follow a structured method, such as Woods' model described here. Articulate your method as you use it so students see the connections. Teach within a specific context. Teach problem-solving skills in the context in which they will be used (e.g., mole fraction calculations in a ...
