"Tapper" Stirling Engine This engine is a Ringbom type Stirling
engine designed by James R. Senft from the book "Miniature
Ringbom Engines" The odd aspect of this engine is that it has a
free displacer piston. Tapper is heated by an alcohol flame about
the size of a birthday candle.

An Introduction to Low Temperature Differential Stirling ...

There are many ways to learn how to make a Stirling engine. If you want to just get going and make your first DIY Stirling engine and you don't care about looks or precision (I mean machine shop precision) then I would suggest some of Jim R. Larsen's books. I have also read and would recommend books by James R. Senft.

An Introduction to Low Temperature Differential Stirling ...

The Ringbom engine, an elegant simplification of the Stirling, is increasingly emerging as a viable, multipurpose engine. Despite its technical elegance, high-speed stable operation capabilities, and potential as an environment-friendly energy source, the advantages manifest in Ringbom design have been slowly realized, due in large to part to its often enigmatic operating regime.
