Establishing Payment
Instrument and GL
Account Relationships
Concept When you
assign a payment
instrument to a record

type or to a record type and a GL bank account, you are setting up rules that enable the system to select which bank account to use during automatic payment processing.

Step Action; Click in the Co field.. Use the Co (Company) field to identify the company number that is associated with the transaction. The system compares the company number on the sales order to the appropriate AAI table. For example, if the order is associated with company 100 but no AAI line is set up for company 100, the system uses the AAI

line for the default company 00000.
