Solar Powered Outdoor Motion Sensing LED Light - Waterproof

The motion sensor light that I have is a simple twin head security light with a motion sensor in the middle of the fixture that can be unscrewed, thereby accessing the wiring. I don't understand how the light would operate with the switch "open". How in the world could it operate if the circuit were open?

Defiant 180 Degree White Motion Activated Outdoor ...

A motion sensor light control switch
turns on the light in an area once it
senses motion. You can override the
motion control on the light switch by
physically turning the off and on levers.
Once the switch senses motion, the light
remains on for a specific length of time
as determined by the motion switch
setting.
