This chapter explores contemporary approaches to governance. It considers corporate governance, Foucauldian approaches to governance, and forms of science and technology governance. The chapter suggests that these approaches neglect the ontological status of people and things. It then explores relations of accountability. Two main kinds of accountability are distinguished.

~~Mundane Governance: Ontology and Accountability 1st Edition~~

In particular, it is crucial to understand how governance and accountability are mediated through material relations involving ordinary everyday objects and technologies. The book argues that the key to understanding governance is to focus on political constitution at the level of ontology rather than just on the traditional politics of organization, structure, and human compliance.

Plastic Water examines the processes behind this transformation. It goes beyond the usual political and environmental critiques of bottled water to investigate its multiplicity, examining a bottle of water's simultaneous existence as, among other things, a product, personal health resource, object of boycotts, and part of accumulating waste matter.
