Draft NIST SP 800-171B was developed in the spring of 2019 as a supplement to NIST SP 800-171. This new document offers additional recommendations for protecting Controlled Unclassified Information (CUI) in nonfederal systems and organizations where that information runs a higher than usual risk of exposure. When CUI is part of a critical ...

NIST Releases Update for Special Publication (SP) 800-171 ...

In response to Executive Order 13556 on managing controlled unclassified information (CUI), it published NIST SP 800-171, Protecting Controlled Unclassified Information In Nonfederal Information Systems and Organizations.

NIST Special Publication (SP) 800-171B (Draft), Protecting ...

Information is represented internally within information systems using abstractions known as data structures. Internal data structures can represent different types of entities, both active and passive. Active entities, also known as subjects, are typically associated with individuals, devices, or processes acting on behalf of individuals.

This Second DRAFT of Special Publication Revision - NIST

NIST SP 800-16, A Role-Based Model for Federal Information Technology/Cybersecurity Training is intended to be used by Federal information technology/ cybersecurity training personnel and their contractors to assist in designing role-based training courses or modules for Federal Organization
