Using qualitative methods to access the pain experience

Methods and Protocols (ISSN 2409-9279) is an international peer-reviewed open access journal aiming to establish and describe new experimental techniques in Biological and Medical sciences. M&Ps is published quarterly online by MDPI. The first issue will be released in 2018. Open Access free for readers, with article processing charges (APC) paid by authors or their institutions.

Evidence Based Practice of Chronic Pain

Overview The Research Need. The Early Phase Pain Investigation Clinical Network (EPPIC-Net) seeks to enhance the treatment of acute and chronic pain and reduce reliance on opioids by accelerating early-phase clinical trials of non-addictive treatments for pain.. About the Program. EPPIC-Net has the capacity to quickly and efficiently conduct many simultaneous multisite studies.
